

FRANCES VAN KEUREN

THE COINAGE
OF HERACLEA LUCANIAE

GIORGIO BRETSCHEIDER EDITORE

1994

ACKNOWLEDGEMENTS

First and foremost, I would like to thank my publisher, Giorgio Bretschneider, and no less R. Ross Holloway, whose idea it was that I undertake the project of writing this study. It was only due to his constant encouragement and excellent criticism that the volume is now complete and in its present form. Roberto Russo's suggestions on the manuscript were also most helpful, as were those of Ms. Ann Johnston, who kindly shared with me a draft of her discussion of Heraclea's coinage (to be included in the next edition of B. V. Head's *Historia Numorum*). In addition, a former colleague of mine at the University of Georgia, Michael A. Jacobsen, read my manuscript and offered valuable suggestions regarding the presentation of my arguments.

Assistance from institutions and museums around the world has also helped to make this study possible. William E. Metcalf, the late Mrs. Nancy M. Waggoner and Mrs. Carmen Arnold-Biucchi were most generous in making accessible the large collection of coins, photographs and casts at the American Numismatic Society in New York, and in providing photographs. Mrs. Waggoner also read and offered helpful criticisms on my manuscript. Francis D. Campbell, Jr., librarian at the American Numismatic Society, provided invaluable assistance in my bibliographic research at New York in the summers of 1979 and 1990 and on several other occasions.

During my visits to Italy in 1980 and 1991, Fausto Zevi, Mme. Enrica Paolini Pozzi and Mme. Renata Cantilena most kindly permitted me to examine and photograph the large collection of coins in Naples' Museo Archeologico Nazionale. Also, Dinu Adamesteanu, Aldo Siciliano and Salvatore Bianco were equally gracious in permitting me to examine and photograph the unpublished bronzes from the excavations at Heraclea (modern Policoro). Aldo Siciliano kindly sent me photographs and casts of several of the Policoro bronzes. Upon the recommendation of Attilio Stazio from the Centro Inter-

nazionale di Studi Numismatici, Giuseppe Andriassi and Mlle. Elena Lattanzi generously permitted me to study and photograph the late staters at Bari, Taranto and Reggio Calabria; and Christof Boehringer kindly provided me with casts of the six unpublished late staters from the dispersed hoard from S. Giorgio Ionico.

H. - D. Schultz from Berlin's Münzkabinett generously provided many photographs of unpublished coins. Martin Price from the British Museum did the same for the large collection in London, and kindly provided access to the London photo file and cast collection. Ettore De Juliis from Taranto's Museo Archeologico Nazionale graciously provided photographs of the Torchiarolo hoard (*IGCH* no. 1977). Additional photographs of published and unpublished coins were kindly supplied by scholars and museums; among them were H. A. Cahn from Basel; T. R. Volk from the Fitzwilliam Museum; J. P. A. van der Vin from the Royal Coin Cabinet in the Hague; the late C. M. Kraay from the Ashmolean Museum; the late O. Mørkholm from the Danish National Museum in Copenhagen; and Mme. Hélène Nicolet-Pierre from the Bibliothèque Nationale. Furthermore, Robert K. Newcomb printed a large number of photographs from my negatives.

The month of study at the American Numismatic Society in the summer of 1990 was funded by a General Research Grant from the American Philosophical Society and the National Endowment for the Humanities' Travel to Collections Program. The trip to Italy in the summer of 1991 was made possible by a second General Research Grant from the American Philosophical Society and a Senior Faculty Research Grant in the Humanities and Fine Arts from the University of Georgia. Finally, grants from the Foreign Travel Assistance Program, the University of Georgia Research Foundation, and from the Art History area, in the School of Art, the University of Georgia, paid part of my expenses for the work at the British Museum in January, 1992.
